

Web Application Developer

Company: eshots, Inc, The Leading Interactive Event Marketing Company, delivers event technologies for all phases of the event lifecycle—before, during, and after your event. The eshots Event Lifecycle Suite is an integrated, proprietary collection of products—used individually or in combination with one another— that allow you to Activate your event, Capture consumer data, and Measure event success. Our platform is used at a number of different events including Superbowl, MLB, NASCAR, College Football, Auto Shows, Ride and Drives, and Concerts.

Job Location: Chicago, IL

Job Description: eshots, Inc. is experiencing growth and seeking a talented web application developer with an entrepreneurial flair. In this role you will be responsible for customizing and deploying a range of products for our Fortune 500 clients' events. You will also work with the team to create and modify features and assist in implementing the technical aspects of the eshots solutions.

Our client-focused culture, creative solutions, flawless event execution and continued event success are the cornerstones to our consistent growth at eshots, Inc. As a key member on the Production team, you will use your development experience to build on our technology leadership by working on products in our Event Lifecycle Suite.

We are seeking an individual who has experience in developing data driven web applications and is looking for a new challenge at a smaller, rapidly growing company where they can have a strong impact. You will be a key asset on our team and in taking eshots to the next level.

Responsibilities:

- Work under the direction of the Production Manager.
- Develop solutions primarily using Coldfusion on Apache/Linux/MySQL stack.
- Responsible for confirming requirements, developing and testing client websites, and managing product deliverables to targeted release dates.
- Assist in creating ad-hoc reports and data transfer processes for our clients.
- Contribute creative ideas to the R&D team to improve eshots product suite.
- Perform rotating technical support role once every 4-5 weeks, which requires answering client calls during technical support hours (including weekends).
- Occasional travel to assist at events is required.

Minimum Requirements

- Passionate, client-focused, proactive self-finisher will ensure a successful fit in the eshots culture
- Bachelor's degree in Computer Science or related fields.
- Experience in data driven web development (Coldfusion, PHP, .net, ASP)
- Intermediate to Advanced skills in core web technologies (HTML, XML, AJAX, JavaScript, and CSS)
- Strong SQL knowledge
- Flex, Flash, jQuery, JSON, and Java development experience a plus
- Comfortable working and learning new technologies on the job
- Ability to multi-task on various projects at the same time

Benefits:

- Salary plus bonus
- Health Insurance and 401K Benefits
- Casual work environment
